

Greetings my fellow spies,

I would like to thank you profusely for attending my presentation. A presentation that will change your life forever. A presentation of the new top of the range spy gadget. Ladies and gentlemen I present to you, the Sunglasses 1000!

Have you ever needed to look through walls? Have you ever needed to see behind you in a life or death situation? Well if you have this gadget is for you! I don't know how you have been in this business for years and not once has anybody thought of this technology until now!

Under the finest, most deluxe British plastic, this shiny, inconspicuous object is not what it seems. The second you put the glasses on your vision becomes one-hundred times better, and if you stare at a person for more than 3.1459 seconds it activates instant facial recognition. Also where the frame connects to the lens it shoots out lasers, which is great for temporarily blinding your opponent and breaking locks. You can activate this feature by tapping three times on the middle of the frame [the bit that rests on your nose].

Another amazing about the Sunglasses 1000 is that you can look through walls, which you can activate with voice control by whispering, 'Wall watching.' You can also look behind you. Again, you can activate this with voice control by whispering 'Beetle battle'. Amidst all this glory, expert scientists have made sure it will only work for the owner with eye recognition.

In conclusion, you will be highly aware of the need to ensure that your spies will be equipped for any situation. Our Sunglasses 1000 only costs £39,999, one-eighth of the cost of a spy training camp. Don't accept any cheaper, inferior alternatives. And remember ladies and gentlemen, this ultimate escape device is the difference between life and death. Thank you for listening to my presentation.
